

FCI Standard No. 134
French Pointing Dog Pyrenean Type
Braque Français Type Pyrénées (Petit Taille);
Französischer Vorstehhund Typus Pyrenäen;
Braco Frances Tipo Pirineo

CLASSIFICATION:

Group: VII Pointing Dogs
Section: 1. Continental Pointing Dogs
Subsection: 1. Braque Type (Continental Pointing Dogs)

Origin: France

INFO: Standard No 134 / 27.02.1996 / GB

(Braque français, type Pyrénées)

TRANSLATION: Mrs. Peggy Davis.

DATE OF PUBLICATION OF THE ORIGINAL VALID STANDARD: 06.05.1988.

With working trial.

CHARACTERISTICS: The small size French Pointers "Pyrenees type" show, while keeping all proportions, with more reduced dimensions and lighter shapes, the same general characteristics as those of the "Gascogne type". They only differ on the following points:

GENERAL APPEARANCE: Rustic dog, not heavy but sufficiently muscled. Skin tighter than that of the Gascogne.

DESCRIPTION:

HEAD: The lips are less pendent and less convex than in the Gascogne type.

NOSE: Brown in color, nostrils well opened.

LEATHERS: Set on above eye line, barely folded. The tips of the leathers must stop at 2 cm from the nose.

NECK: Some or no dewlap.

FLANKS: Belly less let down than in the Gascogne type.

TAIL: Fine; can be docked or naturally short.

FOREQUARTERS: They are lighter than in the Gascogne type.

Shoulders: Muscular and moderately sloping.

HINDQUARTERS:

Feet: Tight.

COAT: Finer and shorter than that of the Gascogne Type.

SIZE: Male: 47 - 58 cm **Female:** 47 - 56 cm The size of 50 to 55 cm is the one to aim for which covers the most numerous utilizations.

FAULTS: Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree.

General appearance : Dog too heavy or hyperlight.

Head: - Lips too droopy or too tight.

- Split nose, flesh-colored.

- Round eyes caused by the exaggeration of the zygomatic and superciliary arches.

- Entropion, ectropion, pink spots at the base of the eyelids (eliminatory).

- Leathers set at eye level, too long (touching the nose).

Body: - Belly too tucked up (whippety).

- No tail (anury).

Legs (quarters): - Splayed feet.

- Syndactyly (toes grown together) surplus toes, absence of toes)

Note: Male animals should have two apparently normal testicles fully descended into the scrotum.
